Featured supplier TECLOCK

Pursuing "Accuracy" " Quality" " Reliability"
for half a century

TECLOCK has been developing dial indicators and their peripheral equipment for the application field since 1950. In addition rubber and plastic hardness measuring equipment were developed in house in 1965. TECLOCK is constantly expanding their technology for measuring the hardness of new materials and non-rigid substitutes. TECLOCK's motto is always "technology first" and to keep developing extremely reliable products continuously. They have provided customers of around 70 countries including Japan with precision measuring instruments, mainly dial gauges for around 50 years since their foundation in 1950. They obtained ISO 9001 certificate in 1997 as the first obtainer in the business field. "We keep aiming at being a pioneer of the new era."

Featured supplier OHNISHI Measurement Co., Ltd.

The best product for your work!

Since their founding in 1950 OHNISHI has built a history as a manufacturer specializing in various types of surface plates and measuring apparatus. OHNISHI's motto is to offer high precision at reasonable prices. They use industrial vacuum packaging on any product where excluding dust or preventing rust or product degradation is desirable in different conditions such as transportation. OHNISHI believes that this is an effective quality control method which also keeps environmental burdens at a minimum.

Application Example

45 Nozzle Type Judgement

By using a fiber sensor and an analog amplifier, nozzles can be categorized according to their inner diameters though they may have exactly the same outer dimensions. The nozzles can be distinguished between when the sensor detects the analog volume of light passing through the hole of the nozzle.

Detection Subject: Gas Pipe Nozzle

Fiber Unit	E32-TC200
Amp Unit	E3XA-CC4A
